

GOLD PIPS SETUP GUIDE

INFO@PIPMAKERS.CO.UK

WWW.PIPMAKERS.CO.UK

/PIPMAKERS-EA

SETUP

This guide will walk you through setting up the EA on your MT4 account.

Assuming you already have a VPS setup you will install MT4 on your VPS using the steps below

(If you do now have a VPS we can guide you through the setup process of this)

We advise using \$1k per 0.01 lot on a MT4 classic 1:500 Fusion account

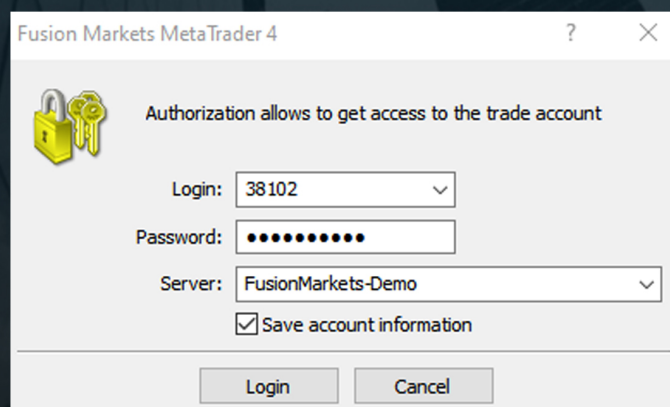

Firstly, if you have not already you will need to download the MT4 terminal from Fusion Markets website, use this link to download MT4:

<https://fusionmarkets.com/hub/en/downloads>

Select the platform you use either Windows or Mac, when downloaded follow the on screen instructions to install onto your VPS.

Once you have installed MT4 you will need to connect your account.

1, Go to File>Login to trade account and you will see below:

The screenshot shows the 'Fusion Markets MetaTrader 4' login window. It features a yellow padlock icon on the left. The text 'Authorization allows to get access to the trade account' is displayed. Below this, there are three input fields: 'Login' with the value '38102', 'Password' with masked characters, and 'Server' with the value 'FusionMarkets-Demo'. A checkbox labeled 'Save account information' is checked. At the bottom, there are 'Login' and 'Cancel' buttons.

2, Enter your account details and be sure to select the server to FusionMarkets-Live, After you click login you will see your balance load into the left hand side of the terminal, your account is connected.

SETUP

3, You then need to copy your EA into your MT4 terminal, this is very easy to do

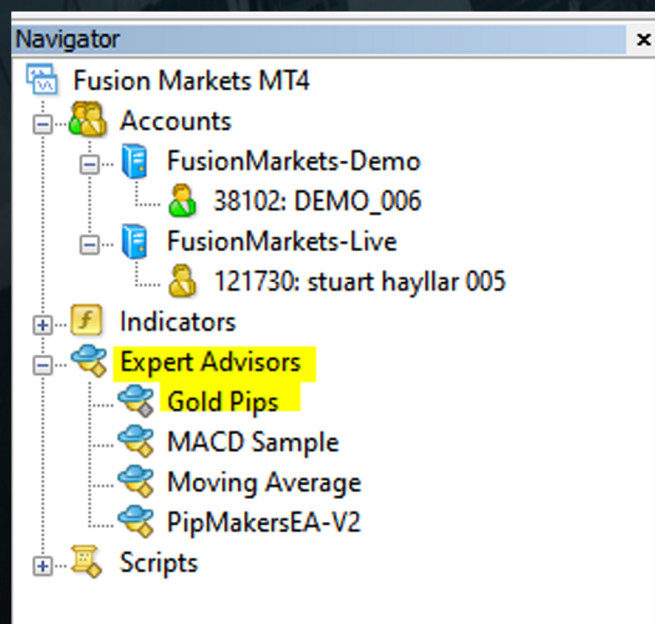

4, Click file>Open Data Folder

5, When this screen opens click MQL4>Experts

Name	Date modified	Type	Size
config	18/12/2021 21:10	File folder	
history	11/02/2022 11:21	File folder	
logs	25/05/2022 22:14	File folder	
MQL4	29/11/2021 21:16	File folder	
profiles	16/02/2021 12:23	File folder	
templates	10/02/2021 14:14	File folder	
tester	29/11/2021 21:21	File folder	
msimg32.dll	14/04/2020 05:42	Application exten...	34 KB
origin	10/02/2021 14:14	Text Document	1 KB

6, You need to locate the Gold Pips.ex4 file and copy and paste in to the Experts folder

7, Close this window and return back to your MT4, navigate to the left hand side and right click Expert advisors and click Refresh

SETUP

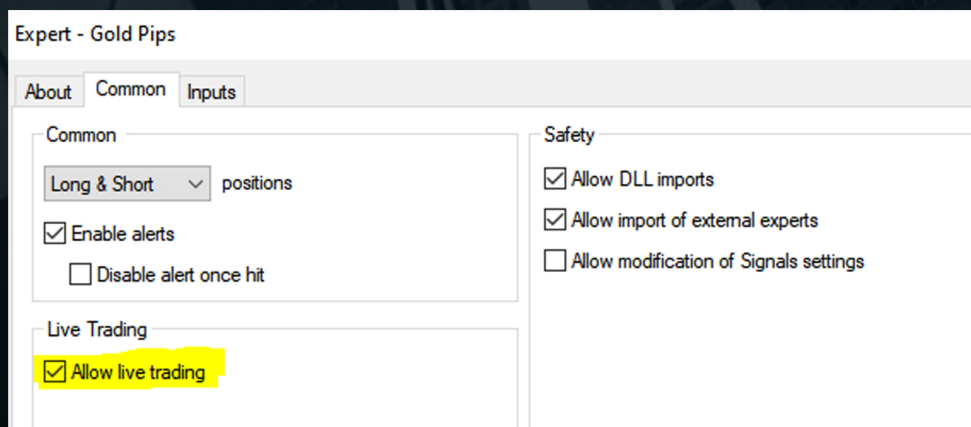

8, After the refresh you will notice Gold Pips is now loaded into the EA list.

9, If any charts are open on the main window click the x to close them all down, we only need XAU USD(gold) Look to the top left at the Market Watch, scroll down until you locate XAUUSD, left click and hold and drag onto the main screen, you will then see a chart open. If you do not see XAUUSD then right click on any and click show all.

10, We then need to change our time frame, We operate this EA on a M1 Timeframe (1 minute)
Click the M1 button as shown below

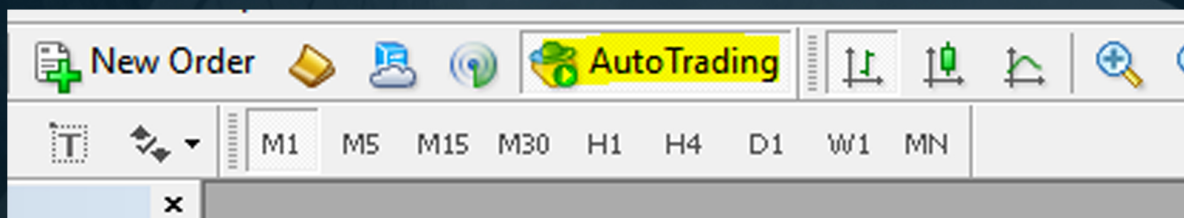

11, We now need to load our EA onto the chart, to do this simply left click Gold Pips and drag on the chart and leave go, click the common tab and make sure Allow live trading is checked

SETUP

12, You will be provided with a set file, to load this click the Inputs tab at the top, then click load, select the set file and then click ok, the settings will be loaded to the panel, then finally click OK.

13, On the chart at the top right you will see a sad face, this needs to be smiley face for the EA to be active to do this on the top bar you will see Auto trading and a red square, click this and it will turn green and the face will smile.

That is it, you are all set to start taking trades on Gold pips EA!
