PIP MAKERS

SETUP GUIDE - SR

SETUP PIPMAKERSEA STANDARD RISK

If you have previously registered with STT you will need to create a new email account and white label account up as the system will not let you register the same email twice or you can log into STT and go to user settings and change the email to spoof the system to let you use your original email to re-register.

1, Firstly click this link http://bit.ly/PIP-HOME - Click signup to get an account with us, enter your details as required then click signup.

2, Go to your email that you signed up with and verify the account.
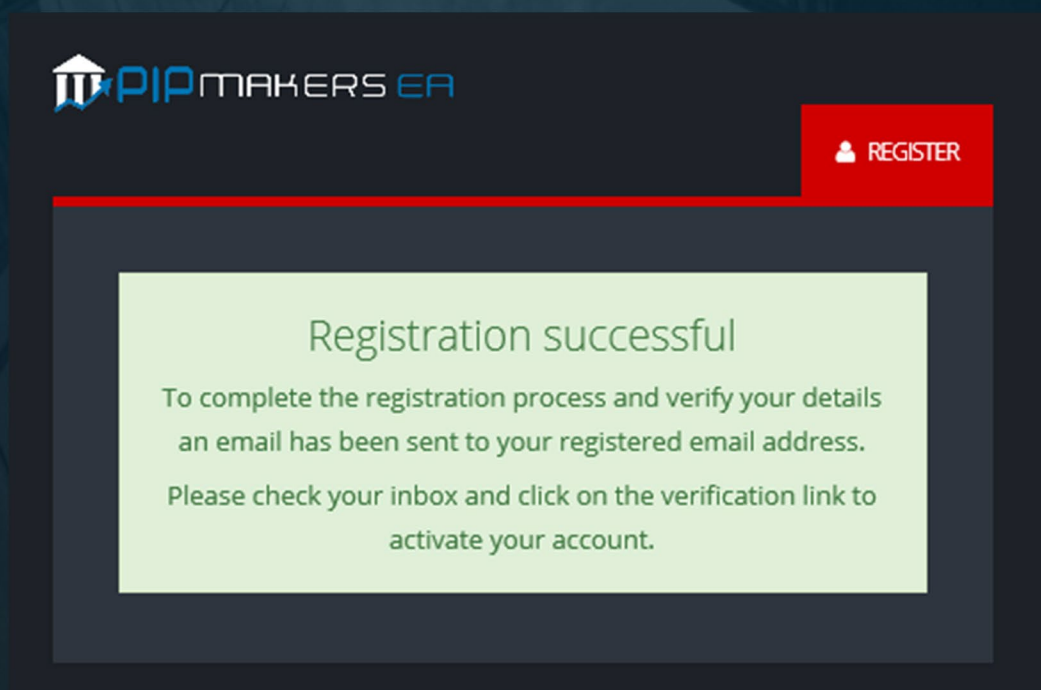

3, Once verified go to http://bit.ly/PIP-SR   click on follow/select then log into your account then follow for the standard signal,
4, Click select, you will notice it says no cost, this is the only way we can stop the system auto generating invoices and sending them.

The performance fee and hosting fee are to be paid no later than the 8th and you will receive an invoice on the 1st of each month, this will be sent to the email you registered on the PipMakers website not social trader tools.

Once you have registered, you will only need to pay the rest of month hosting fee pro rata, contact support for details of this.

SETUP PIPMAKERSEA STANDARD RISK

5, Go to the cogs(configurator) then click add account
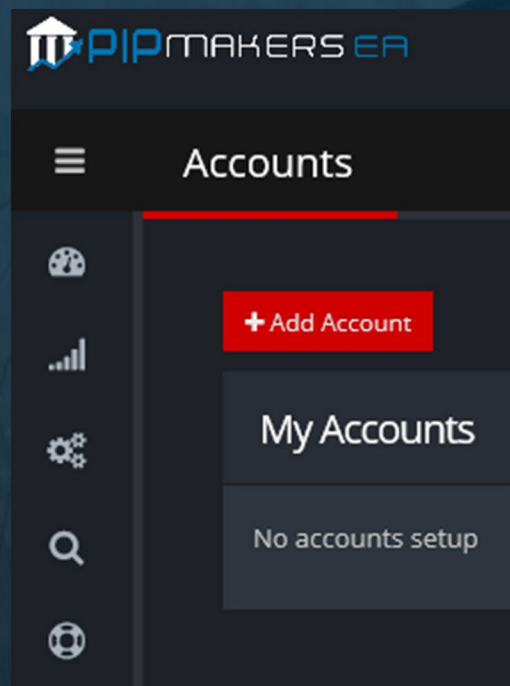

6, Enter your MT4 account number, password and server, these would have been emailed to you when you registered for your broker.

Please note that we now from 23/02/2021 only allow Fusion Markets to follow our signal, no other broker is permitted.
Get fusion broker HERE

In descriptive name, please enter your full name as you registered with us.

7, Click add account and you will soon be connected

Add Account

Account installing

This process can take up 60 seconds to complete

8, once connected click view account

Add Account

Account has connected to the system successfully

View Account
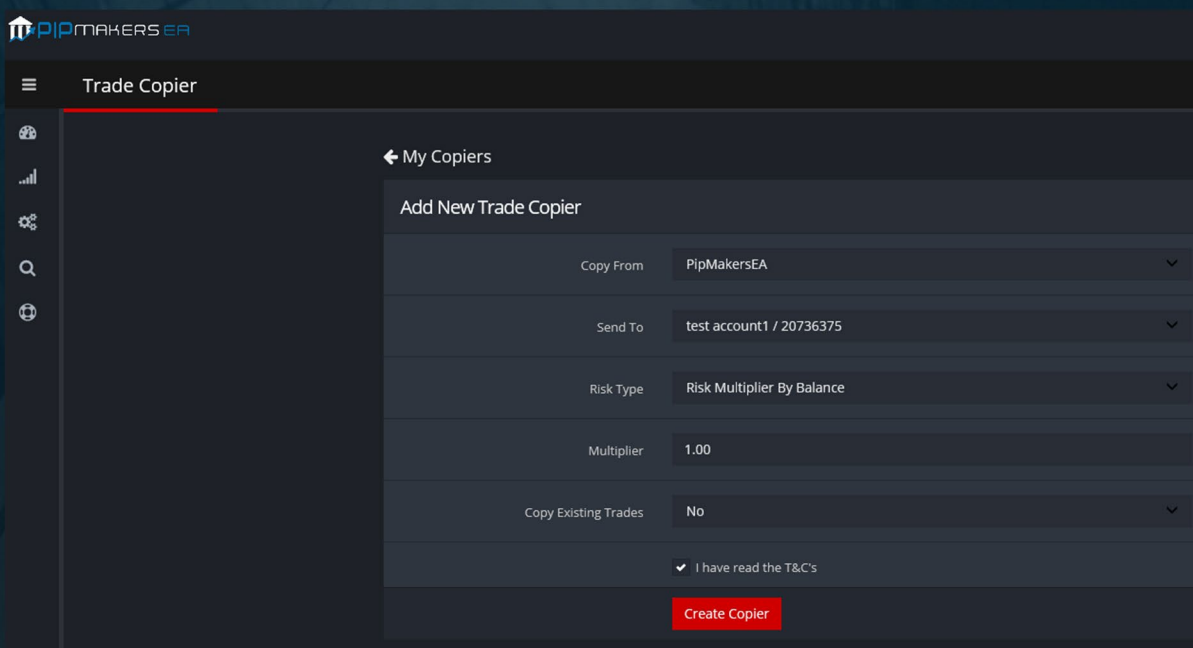

9, click the cogs on the left hand side again then trade copier then add copier.

PIPMAKERS EA

Trade Copier

+ Add Copier

My copiers

No copiers setup
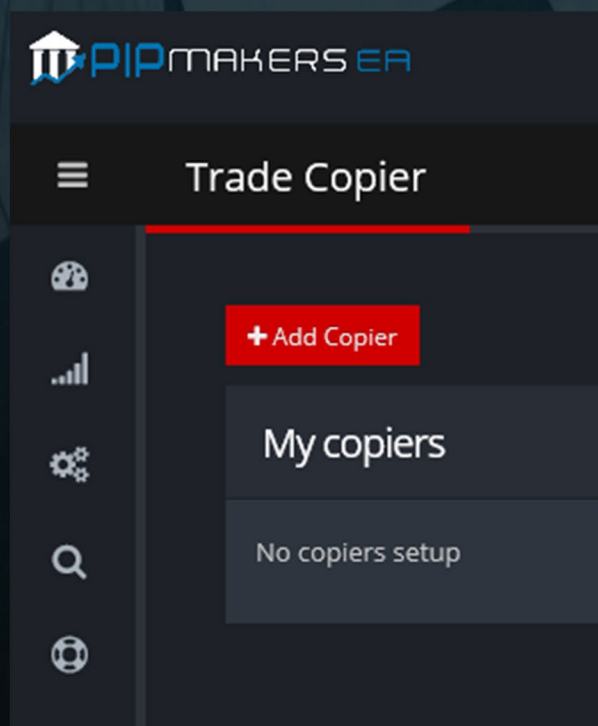

SETUP PIPMAKERSEA STANDARD RISK

10, For standard accounts Select PipMakersEA-StandardRisk-Fusion as the `copy from` and your account as the `copy to` account.
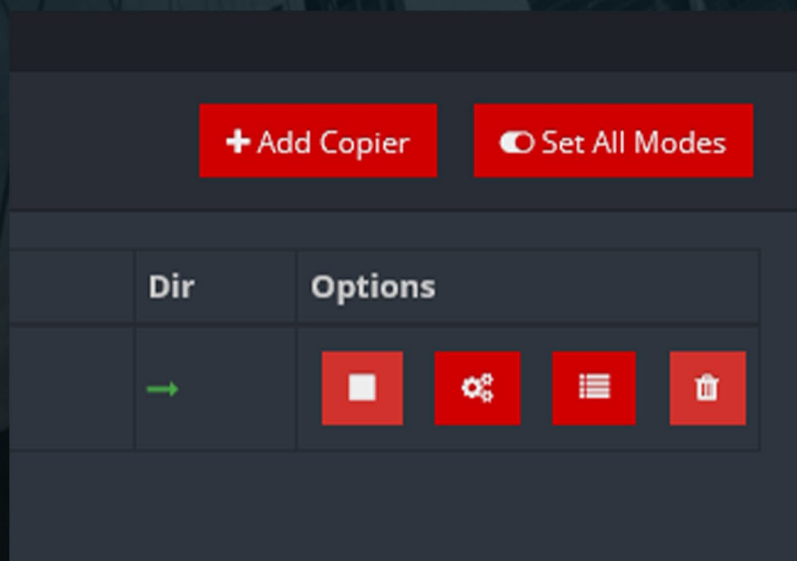

Leave other settings as they are, you must NOT change the multiplier at all, click t&c`s and create copier.

11, Click on the cogs.
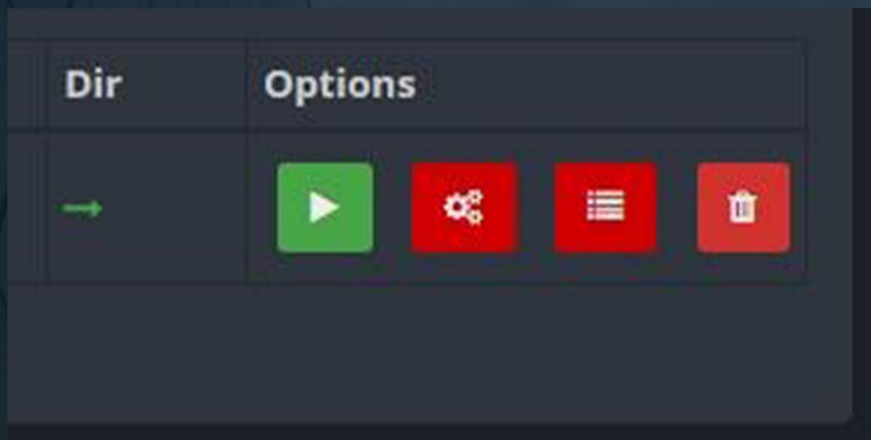

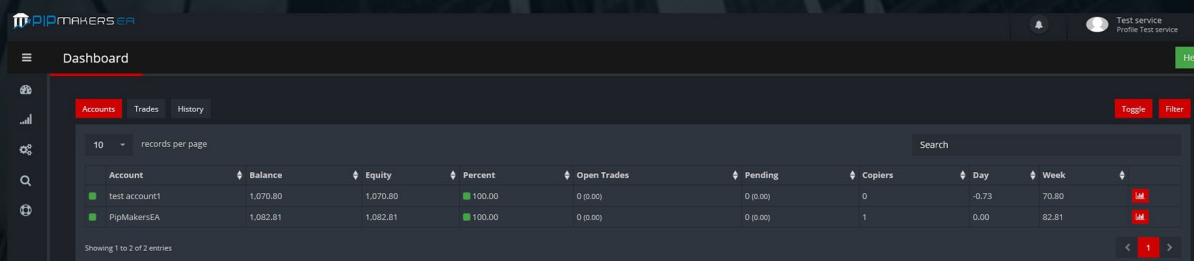

12, Click Stops&Limits, Make sure copy stop loss and copy take profit are set to yes, click update. Please do not change anything else.
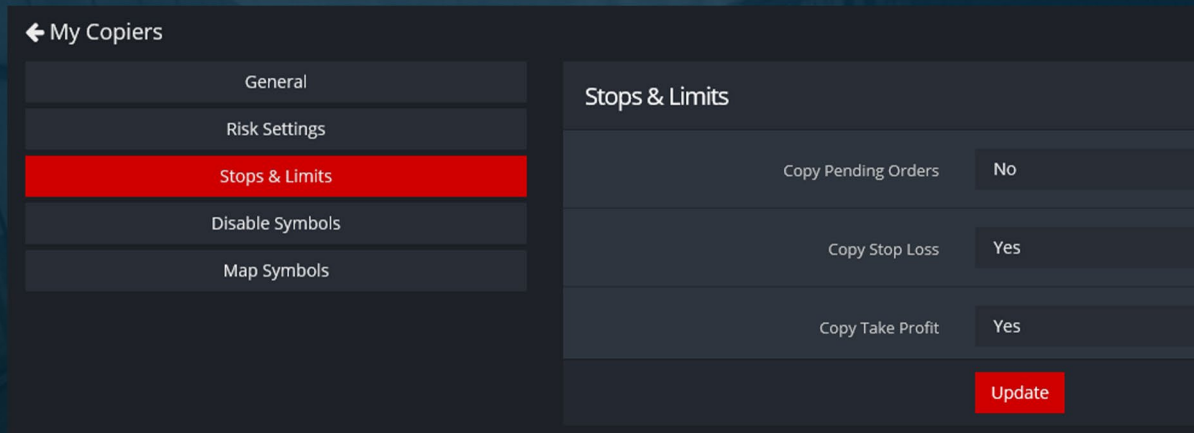

13, Click the cogs on left hand side/trade copier then click the red stop button with White Square inside click ON and then update, it will then change to a green symbol shown below.

14, Finally click on dashboard in top left and you will see your account and the master account with 2 green squares, this means you are all connected to us.

Thank You
